

Smash, suspension design Diesel Creative Team

Smash is eye-catching at first glance thanks to its unprecedented shape that recalls a squashed bell: this visual effect has a strong industrial identity, which is emphasised by the special exterior finish and by the curled metal used to create the characteristic rim of the diffuser. Its special shape gives rise to various games involving perspective, depending on the position of both the observer and the lamp. Smash is available in two colours: rust, which recalls industrial settings, and grey, with a versatile and contemporary personality. In both colour versions, the interior is painted white to create a two-tone effect with the exterior finish and increase light diffusion, generating a warm and uniform effect.

Smash, suspension technical info

Description

Suspension lamps with direct down light. Diffuser in aluminium slab turned in a mould; subsequently a second turning process is performed in a mould to achieve the bending of the lower rim, followed by a third bending process to achieve the characteristic oval shape. The brown version is painted on the exterior in two steps: the first coat of coloured paint is applied, followed by a second coat with a black "drop" effect to create a rough and textured finish on the aluminium. The grey version is powder coated on the exterior; for both versions the interior is liquid coated in white. Black load-bearing electrical cable, canopy with galvanised metal bracket and matt black batch-dyed ABS cover.

Materials: pressed glass, aluminium, steel and laquered metal

Colours: grey, rust

Brightness

direct down light

Model

Smash

Weight

net kg: 1,80
gross kg: 2,50

Packing

vol. m³: 1,000
n.boxes: 1

Bulbs

- Halogen 1x57W E27
- LED Retrofit/Fluo 1x10W E27

Diesel Creative Team

In 2009, Foscarini signed a partnership agreement with Diesel as part of the "Home Collection" home furnishings and lifestyle project. This partnership has given Foscarini the opportunity to make contact with a new target clientele and explore new lifestyles and furnishing trends through a collection conceived by Diesel for its own target group: "Diesel Living with Foscarini".

The Diesel Living with Foscarini collection speaks a range of different languages - from rock to pop, industrial to vintage, graphics to art - to illustrate the unmistakable Diesel lifestyle. Ironic, transgressive, eclectic, incandescent, the collection is made up of over 40 different lamp models. The collection is structured into a range of forms, materials and intended uses, lending itself to unexpected and unconventional settings, from domestic to public environments, always with a strong personality. The materials selected and researched for Foscarini, and perhaps even more so in the Diesel Living with Foscarini collection, are of the utmost importance. Materials which have never before been used in the lighting industry are the collection's added value.
