

5165 Khalifa Pendant 1 Light GU10 Copper

A beautiful pendant finished in copper within the Khalifa range.

Color: Cooper

Mantra M5165 Khalifa Pendant 1 Light GU10 Copper

Designed by Santiago Sevillano, the selection of pendant lights in the Khalifa range are inspired by traditional luxury of the Arabian world. The sleek, smooth framework, which leads from the adjustable clear cable suspensions, curves into a substantial crystal rim. These crystal components have uniquely sculpted facets to optimise and expand the light reflections. The GU10 pendants are available in a polished chrome or a rich copper finish. The second design in the Khalifa range offers an integral LED solution in order to achieve the up and down illumination of a crisp white (3000K) light. Khalifa is sure to bring elegance to all its applications.

A single pendant which is height adjustable during installation making it suitable for both high and low ceilings. The copper finish looks great over kitchens islands and counters and looks stunning as a stand-alone pendant or grouped in threes. The fitting can be used with LED lamps which are highly energy efficient.
